INTRODUCTION

This report summarizes the import interceptions submitted to the Diagnostic Services Division, Agriculture Canada. It covers the period from April 1, 1990 to March 31, 1991 and lists pests found to be associated with plants and plant products entering Canada.

Information contained within is sorted in three ways: by PEST, by HOST and by COUNTRY OF ORIGIN. Primarily, these lists highlight pests of quarantine significance but may also include new interceptions or new host plant records. In addition, pests of limited Canadian distribution or even pests of a more cosmopolitan nature may occasionally appear.

Most of the identifications were done by staff of the Diagnostic Services Division, with support from the Research Branch of Agriculture Canada and the Canadian Museum of Nature.

Virus indexing is performed at the Saanichton Plant Quarantine Station in Sidney, British Columbia.

A summary of the Canadian Intercepted Plant Pests yearly reports (1958-1990) is available upon request. Further information may be obtained from:

INTRODUCTION

Le présent rapport fait état des ravageurs interceptés à l'importation et envoyés à la Division des services de diagnostic phytosanitaire d'Agriculture Canada. Il couvre la période du 1er avril 1990 au 31 mars 1991 et a trait aux ravageurs qui ont été trouvés sur des végétaux et leurs produits à leur entrée au Canada.

Les renseignements sont classés sous trois rubriques, soit par RAVAGEUR, par HÔTE et par PAYS D'ORIGINE. Ces listes portent principalement sur les ravageurs justifiables de quarantaine, mais peuvent également comprendre de nouveaux ravageurs ou de nouveaux hôtes. Occasionnellement, des ravageurs de distribution restreinte au Canada ou de nature plus cosmopolite peuvent y figurer.

La plupart des ravageurs ont été identifiés par le personnel de la Division des services de diagnostic phytosanitaire avec l'aide d'employés de la Direction générale de la recherche d'Agriculture Canada et du Musée canadien de la nature.

L'indexage est réalisé à la Station de quarantaine des plantes de Saanichton, à Sidney, en Colombie-Britannique.

On peut se procurer sur demande un résumé des rapports annuels (1958-1990) des ravageurs de végétaux interceptés à leur entrée au Canada. Pour de plus amples renseignements, veuillez communiquer avec:

SUMMARY OF PEST INTERCEPTIONS

This report includes only those import interceptions that were submitted to Ottawa during the fiscal year 1990-1991. The actual numbers of intercepted pest species are listed in the table below.

It should be noted that if an organism from a particular host and origin has been identified more than once it will only appear on the Pest List as a single entry.

NOMBRES DE RAVAGEURS INTERCEPTÉS

Le présent rapport ne fait état que des ravageurs interceptés à l'importation qui ont été examinés à Ottawa au cours de l'exercice financier 1990-1991. Le nombre exact des espèces de ravageurs interceptés est donné au tableau qui suit.

Même si un organisme provenant d'un hôte ou d'un pays d'origine déterminé à été trouvé plus d'une fois, son nom n'apparaît qu'une fois dans la liste des ravageurs.

PEST ORGANISMS **ORGANISMS RAVAGEURS**	**NUMBER OF INTERCEPTIONS** **NOMBRE D'INTERCEPTIONS**
Arthropods and Molluscs Arthropodes et mollusques	258
Nematodes Nématodes	114
Fungi and Bacteria Champignons et bactéries	42
Viruses Viruses	not applicable pas applicable
TOTAL	**414**

PEST LIST / LISTE DES RAVAGEURS

(Abbreviations / Abréviations)

Intended use categories / Catégories d'usage prévu:

P = propagation
C = consumption / consommation
O = other / autre
- = unknown / inconnu

Transport categories / Modes de transport:

B = baggage (air passenger) / bagage (par avion)
C = cargo / marchandise
M = mail / poste
O = other / autre

Provinces:

AB = Alberta
BC = British Columbia / Colombie-Britannique
MB = Manitoba
NB = New Brunswick / Nouveau-Brunswick
NF = Newfoundland / Terre-Neuve
NS = Nova Scotia / Nouvelle-Écosse
ON = Ontario
PE = Prince Edward Island / Île-du-Prince-Édouard
PQ = Quebec / Québec
SK = Saskatchewan

Other symbols / Autres signes:

sp. = species / espèce
? = uncertain / douteux
